Additional Information

Terms, Conditions and Policies for the Website Design service · Silicon Valley AI Coach

What you get

One finished website: one page, in one language — English or Spanish, you choose — with the elements in your tier.

The three tiers: **Tier 1 · Starter Page — $282** · **Tier 2 · Business Page — $390** · **Tier 3 · Full Build — $766**. Each tier includes everything in the tiers below it, plus more. The full scope of each tier is on the service page.

The whole website transferred to you at closing: the internet address, the page, the website email, and the account.

The first year of the internet address, the page's home, and any mailbox you chose — included in your price.

Two rounds of changes included.

Your closing papers: your signed Agreement, your payment receipt, and the list of your year-2 renewal dates and amounts.

How the service works

The road your order travels · step by step

Your step · Our step · Together

START

▼

1 Pick your tier

Choose Tier 1, Tier 2, or Tier 3 on the service page. Each tier shows its full price, what it includes, and how long the work takes.

YOU · ON THE SERVICE PAGE · ABOUT 5 MINUTES

▼

2 Complete the information form

Every item filled in — or marked N/A (not applicable).

YOU · ONLINE FORM · ABOUT 15 MINUTES

3 We check your website name request

In your country and your state or province — and that the website address is free.

US · ONLINE CHECKS · 1 BUSINESS DAY

Is the name free and clear?

NO ↓ YES ↓

Name taken? You pick another name — **we check again** ↻ back to step 3.

4 Sign the Agreement, then pay

Our clock starts at your payment — never before.

YOU · SIGNATURE + CHECKOUT · ABOUT 5 MINUTES

5 We build your website

Built in our account, checked twice, then published for your test.

US · OUR ACCOUNT · FIRST DRAFT IN ABOUT 3 BUSINESS DAYS · TIER 3: ABOUT 8

6 You test it — we change it

Two rounds of changes are included.

YOU REVIEW · WE CHANGE · UP TO 3 DAYS PER ROUND

No answer in 3 days? We finish your website with the information from your original form.

7 Closing — the website moves to you

You change the password, set the recovery to yourself, and sign that you received it well.

TOGETHER · INSIDE THE SAME PLATFORM · ABOUT 15 MINUTES

THE WEBSITE IS YOURS

The Agreement

Agreement — its full name is **Purchase and Sale Agreement**. It is the paper you sign before you pay. It says: we will build your website and transfer it to you, and you will pay the price of your tier. Signing it starts the sale. The transfer itself happens at the closing, when the website moves to you. This document holds the full terms.
Why do we work this way? Because our clients asked for it: “I pay for the website, and you give me a website. I pay you to take care of everything — my only part is the payment.”

Terms and Conditions

1. **What this service is** We build one landing page (Level 1) — one page, in one language — with the elements in your tier, and we sell you the finished website. This sale works under an Agreement (a Purchase and Sale Agreement): the website is built in our account and is legally ours until the closing transfer.

2. **What this service is not** It is not a store, not a checkout website, and not more than one page. It does not include accounts created for you on other services. We do not create email or social media accounts for you.

3. **Prices** Your total to start is the fixed price of your tier: $282 (Tier 1), $390 (Tier 2), or $766 (Tier 3). It covers the construction and the first year of the internet address, the page's home, and any mailbox you chose. From year 2, you pay the platform for the address, the home, and any mailbox. Those amounts are estimates. The platform can change its prices. Your closing papers list the dates and amounts in force at closing.

4. **Start of work** Work starts only when three things are done: your information form is complete (every item filled in, or marked N/A — not applicable), you have signed the Agreement, and your payment has arrived. Our clock starts at payment.

5. **Your name** We build only over names that are available. Before we build, we run a general search for your chosen name in your country and your state or province. Our search is a general search. It is not a lawyer's trademark clearance, and it is not legal advice. If the name is already in use there, we tell you, and you must pick a different name. We search again. Section E states who carries the risk for the name.

6. **The build** Your website is built in our account, with our user name and our password. It stays unpublished while we build. When the build is ready, we publish it so you can test it. During the test, the

public can see the page.

7. **Rounds of changes** Two rounds of changes are included. In each round, you have up to 3 days to review and send your changes. We return our changes within 2 business days. An extra round costs $48. **If we do not hear from you within your 3 days, we finish your website with the information from your original form — exactly as you gave it at the start.**

8. **No answer at all** If you never answer, we still build your website, and we tell you so in writing. The transfer never happens without your signature. Your website stays unpublished, in our account, alive for the first year you paid for. If that year ends and you never came back, the address and the home expire. We do not pay renewals for a client who never returned. At any time before that year ends, you can answer, sign, and take the transfer, and take over the renewals.

9. **Placement** We place each element only in functional spots. A functional spot is a spot where your website can move from desktop view to tablet view to mobile view and keep a logical, coherent structure in each display mode. A spot that works in one view but breaks another is not offered.

10. **Your files** Picture: JPG or PNG, up to 6,000 pixels on the longest side, up to 10 MB. Video: MP4 or MOV, up to 1920 × 1080, up to 60 seconds, up to 100 MB. Files can arrive through the information form, or by a Drive link, a TikTok link, or any other link we can download from — at the start and in the change rounds. You state that the words, pictures, videos, and logo you give us are yours to use, or that you have the right to use them.

11. **Email** Forwarding is a setting, not a mailbox: mail to your business address is passed to the inbox you already use, and your answers go out from your normal address. A mailbox is a real mailbox with your website's address: you receive and answer as your business address. Both live inside your website's account and move to you at the transfer.

12. **Cancellation** If you cancel, the work already done stays paid, and work not yet done is not charged. If we cancel, we refund the part of the work that was not done.

13. **Closing and transfer** Closing is one act: the website — the internet address, the page as built, the email, and the account — moves to you inside the same platform; you change the password and set the account recovery to yourself; we delete our copy of the password; and you sign "satisfactory project received." A new internet address cannot move to a different company for 60 days (a rule of the internet address system). A move inside the same platform works on day one.

14. **After closing** The website is yours. Renewals from year 2 are yours to pay, on the dates in your closing papers. Changes after the closing signature are new work, priced separately.

15. **No promises beyond the product** We promise the finished website described in your tier, delivered as agreed. We do not promise visitors, sales, or search positions. Selling is your business's work. We provide the means.

16. **The agreement** Your signed Agreement — its full name is Purchase and Sale Agreement — (typed name, "I agree," and the date and time) plus your payment receipt are the agreement. Both sides keep a copy.

What You Sign

Your Agreement (Purchase and Sale Agreement). We will build the website described in your tier, in our account. You will buy the finished website at the price of your tier. The transfer happens at closing, when you sign that you received it well.
Type your full name: [_____]
☐ **I agree** to my tier and to the terms and conditions.
Date and time are recorded with your signature.
For clients inside the United States — one more, separate click, required before the pay link:
☐ **I verified that the name I chose is not owned by another company, and I release you from responsibility for it.**
For clients outside the United States: the name you chose is your responsibility. If another company owns the name you chose, in your country or anywhere, that risk is yours. We build over the name you give us, after our general search comes back clean.

Plain Words

Internet address (domain): your address on the internet — the name people type to find your page.

Home (hosting): the rented space where your page lives.

Header: the top part of the page. **Footer:** the bottom part of the page.

Legend: the line of words under a picture or video.

Agreement: the paper both sides sign before payment. Its full name is Purchase and Sale Agreement. It says we will build your website and transfer it to you, and you will pay the price of your tier. The transfer itself happens later, at the closing.

Transfer: the moment the whole website — address, home, email, and account — moves from us to you.

Closing: the final step, where the transfer and your signature happen together.
